

Date: 18 Nov 2017

A. **Using** [1SD software or Mobile App generate the intraday or weekly levels of any stock, future or commodity to experience similar success.](#)

B. **Access** [WHAT 1-SD SOFTWARE BUYERS ANALYSED YESTERDAY USING THE SOFTWARE .](#)

### SWITCH TO WEEKLY TRADE WITH 1-SD IF YOU ARE FAILING IN INTRADAY

Friends!

1 SD formula which is giving success in weekly forecast from past **98 weeks**. Below given weekly level for nifty future and bank nifty future for **108<sup>th</sup> Week** (i.e. 20<sup>th</sup> to 24<sup>th</sup> Nov 2017).

What is 1 SD formula? Price range= (Price \* volatility \* square root of day) /square root of 365

Trend identification as per Fibonacci principle

1sdprice range		122.229	
	Nifty	10298.9	
<b>Nifty future Trend with real time volatility 8.57</b>			
0.236	28.846	10327.7	10270.1
0.382	46.691	10345.6	10252.2
0.5	61.114	10360	10237.8
0.618	75.538	10374.4	10223.4
0.786	96.072	10395	10202.8
0.888	108.54	10407.4	10190.4
1.236	151.08	10450	10147.8
1.618	197.77	10496.7	10101.1

**Range bound trend identification:** if all up-move invites sale **above 10360** and all down move invites short covering **at 10238** level this indication is sufficient to conclude that the price action is in the range of **10360 to 10238**.

**How to trade nifty future in uptrend above 10328?** if nifty cross 10328 then you buy future with 10350 put option buy stop loss 10252. If it achieves the 1<sup>st</sup> target 10374 during the day or any point during the week revise your stop loss to 10345 and hold the trade. If the 2<sup>nd</sup> target 10395 achieved revise the stop loss to 10360 and hold the trade. If the 3<sup>rd</sup> target 10407 achieved, then trail or revise the stop loss to 10395. Continue this till last target is not achieved or trailing stop loss is not triggered. If trailing stop loss trigger, then close the hedging option position also.

**How to trade nifty future in Down trend below 10320?** if nifty fall below 10270 then you sell with 10250 calls option buy stop loss 10346. If it achieves the 1<sup>st</sup> target 10223 during the day or any point during the week revise your stop loss to 10252 and hold the trade. If the 2<sup>nd</sup> target 10203 achieved revise the stop loss to 10238 and hold the trade. If the 3<sup>rd</sup> target 10190 achieved, then trail or revise the stop loss to 10203. Continue this till last target is not achieved or trailing stop loss is not triggered. If trailing stop loss trigger, then close the hedging option position also.

**Note:** I am using the call long simple option strategy to demonstrate hedging principle in trade. However, you can write the option also and do any complex strategy to protect the trade.

If your trade is with the option hedge and future has reached the stop loss, then do not quit the trade in hurry better wait for conclusive price crossover of 0.382 retracement

**C.** [Desktop edition+ App- Real time software using the - 1SD concept @ Rs5000 per year](#) Call sales at 9840348971 /09841736980/044-64995823 to purchase.

**D.** To be a successful trader you have 2 choices:

Choice 1. Lose money unintelligently 1<sup>st</sup> then learn.

Choice 2: Invest in your trading education 1<sup>st</sup> learn then trade. Now choice is yours.
