SWITCH TO WEEKLY TRADE WITH 1-SD IF YOU ARE FAILING IN INTRADAY

Friends!

1 SD formula which is giving success in weekly forecast from past **89weeks**. Below given the weekly level for nifty future and bank nifty future for **99th Week (i.e. 18th to 22nd Sep 2017)**.

What is 1 SD formula? Price range= (Price * volatility * square root of day) /square root of 365

$$=(10095.60 \times 0.0796 \times \sqrt{7}) / (\sqrt{365})$$

Trend identification as per Fibonacci principle

1sdprice range		111.288	
Nifty		10095.6	
Nifty future Trend expectation			
0.236	26.264	10121.9	10069.3
0.382	42.512	10138.1	10053.1
0.5	55.644	10151.2	10040
0.618	68.776	10164.4	10026.8
0.786	87.472	10183.1	10008.1
0.888	98.824	10194.4	9996.78
1.236	137.55	10233.2	9958.05
1.618	180.06	10275.7	9915.54

Range bound trend identification: if all up-move invites sale above 10151 and all down move invites short covering at 10040 level this indication is sufficient to conclude that the price action is in the range of 10151 to 10040.

How to trade nifty future in uptrend above 10122? if nifty cross 10122 then you buy future with 10100 put option buy. If it achieves the 1st target 10164 during the day or any point during the week revise your stop loss to 10138 and hold the trade. If the 2nd target 10183 achieved revise the stop loss to 10151 and hold the trade. If the 3rd target 10194 achieved, then trail or revise the stop loss to 10183. Continue this till last target is not achieved or trailing stop loss is not triggered. If trailing stop loss trigger, then close the hedging option position also.

How to trade nifty future in Down trend below 10069? if nifty fall below 10069 then you sell with 10050 calls option buy. If it achieves the 1st target 10027 during the day or any point during the week revise your stop loss to 10053 and hold the trade. If the 2nd target 10008 achieved revise the stop loss to 10040 and hold the trade. If the 3rd target 9997 achieved, then trail or revise the stop loss to 10008. Continue this till last target is not achieved or trailing stop loss is not triggered. If trailing stop loss trigger, then close the hedging option position also.

Option strategy: Contra trend net credit option strategy in nifty:

- a. if nifty give up trend cross over 10122 then sell October 10100 put and buy 10050 September put each one lot book profit above 10165 book loss below 10053.

- b. if nifty give down trend cross over 10069 then sell October 10100 call and buy 10050 September call each one lot book profit below 10027 book loss above 10138.

For real time profit and loss analysis refer our option strategy software

Note: I am using the call long simple option strategy to demonstrate hedging principle in trade. However, you can write the option also and do any complex strategy to protect the trade.

If your trade is with the option hedge and future has reached the stop loss, then do not quit the trade in hurry better wait for conclusive price crossover of 0.382 retracement
